

# AltaPoint 8.0

## **Announcing AltaPoint Version 8.0**

Packed with many customer-requested features, AltaPoint 8.0 raises the bar for ease-of-use, advanced functionality, and value.

### ***New in Version 8 Practice Management:***

#### **Updated Look**

Expanded support for custom colors and desktop themes.

#### **New Appointment Options**

Specify the visit type and reason for new appointments. Use appointment templates to protect time blocks or to reserve blocks for specific visit types.

#### **Appointment Wait Lists**

Avoid lost revenue from cancelled or missed appointments by staying on top of your patient wait-list requests. You can view your wait list by time placed, provider, priority, and even procedure.

#### **Insurance Claim Scrubbing with Pre-Insurance Reporting**

Save time and improve cash flow by validating important claim data BEFORE submitting to payors.

#### **New Custom Fields**

For maximum flexibility, there are now 20 custom claim fields as well as 5 local-use fields for billing detail.

#### **Document Categories**

Add a category to each patient document with the option to view only those document types from the Patient Documents tab.

#### **Email and E-Fax Documents and Reports**

Email or E-Fax any report, form, or document.

#### **Report Formatting Enhancements**

Position, size and stretch boxes by using the Shift and Arrow keys. Effortlessly move objects forward, backward, to the front, and to the back of the report layout. Jump to specific lines or search for fields and labels within the report detail.

#### **Standards Compliance**

Full support for practice NPI numbers, NDC codes, as well as other standards.

### ***New in Version 8 EMR:***

#### **Modifiable Screen Format**

Modify the EMR screen to include the options you use most. Customize buttons and add new EMR screens including images and documents.

#### **Fully Modifiable Encounter Form**

Use the forms editor to modify the layout and format of any data element on the encounter form.

#### **Visit Check-In**

Check a patient into an EMR visit directly from the Appointment Scheduler

#### **Immunizations**

Add new immunization schedules and define your own immunization combinations.

#### **Word Lists**

An expanded word-list editor with word-list categories. Import and export work lists - including expanded notes.

#### **Labs**

Attach PDF documents to lab results.

#### **Exam Quick-Jump**

Instantly jump to specific exam detail within the visit.
